Breakpoints Naming System for Responsive Design Figma

Category	Name in design	Frame width	Container width	Number of columns	Gutter	Margin
XL Desktop	xl-desktop	1920px	1640px	12	20px	160px
XL Desktop	xl-desktop	1920px	1440px	12	20px	260px
XL Desktop	xl-desktop	1920px	1240px	12	20px	360px
XL Desktop	xl-desktop	1728px	1240px	12	20px	264px
Desktop	lg-desktop	1680px	1440px	12	20px	140px
Desktop	md-desktop	1440px	1240px	12	20px	120px
Desktop	sm-desktop	1366px	1140px	12	20px	134px
Desktop	xs-desktop	1280px	1040px	12	20px	140px
Tablet	lg-tablet	960px	840px	12	20px	80px
Tablet	md-tablet	768px	640px	12	20px	84px
Mobile	mobile	480px	440px	6	40px	20px
Mobile	mobile	360px	320px	6	40px	20px

It is recommended to use a 1920px frame width for Full HD monitor screens.

For platforms like Webflow, WordPress, and libraries such as TailwindCSS and Bootstrap, it's advisable to set the frame width to 1728px and the container width to 1240px.

- The container width consists of 1200px for content, with 20px outer margins on both sides, totaling 40px for margins.

For the Kajabi platform, it's recommended to use a 1920px frame width with a 1340px container width, which also includes 20px margins on each side of the content.
